Hi, Mead, would you provide any information you might have from the upcoming March 18, 2016 walk-through, when available, to Dr. Leidy and copy me?

Hi Julia,

Hope you are well. Given the relatively wet year beginning last monsoon season, I am curious about what flows currently look like in Davidson Canyon, especially in the OAW reach upstream from I-10 near the spring. Has anyone walked that recently? If so, have any frogs or fish been observed?

Best,

Rob
